

## Covidien Animal Health

Prevention/Treatment of Hypothermia in Animals  
Before, During and After Surgery

The WarmTouch™ convective air warming system gives you a convenient, cost-effective way to provide normothermia and clinical warmth to your animal patients, which minimizes post-surgical complications and improves recovery time.

Warm air is delivered into the WarmTouch™ warming blanket, connected to the warming unit, allowing the warming system to cover the animal with warm air, actively transferring heat across the animal's skin.

WarmTouch™ 5300A  
Warming Unit  
*Not Too Hot. Not Too Cold.*

### Product Features/Benefits:

- Fast warm-up to 38°C in 30 seconds saves time and money.
- Collapsible, self-supporting hose stores securely out of the way.
- Smooth durable housing allows easy cleaning.
- Quiet operation does not interfere with normal conversation.
- Highest airflow rate of any convective air warming system, 55 CFM.
- Multiple mounting options including floor placement.
- Digital hour meter on front for easy reference.
- Safety alarm and shut off if temperature exceeds 45°C.

## Covidien Animal Health CareDrape® and CareQuilt® Warming Blankets

CareDrape® Pediatric  
For Pre-Op and Surgery  
22" x 35" inflated

CareQuilt® Pediatric  
For Pre-Op and Post-Op  
33" x 74" inflated

### Features and Benefits

- Quilted design and construction promotes uniform air flow, helps blanket conform to animal's body and folds back easily for patient access without restricting airflow.
- Soft outer fabric feels comfortable against skin with no hot plastic surfaces.
- Strong two-ply material, combined with layered construction, allows blanket to be fluid resistant and helps prevent tears and punctures.
- Precision die-cut holes help provide even air flow to warm body evenly, providing effective temperature management.
