

Covidien Animal Health

Monoject™ Softpack Syringe Only and N&S Combinations Injection Comfort for Companion Animals

Features and Benefits:

- **One-step, peel-away package** facilitates quick and easy opening for aseptic handling.
- **Convenient, individually packaged inner cartons** are ready to ship for distributors and make it easy for clinic staff to dispense the contents.
- **Clear, non-glare barrel construction and bolder heat-etched scale** allows for precise medication measurement and easier visualization of flashback. Graduations cannot be erased or altered.
- **No PVC or DEHP.** Barrel and plunger are made from polypropylene.
- **Latex-free.** Plunger tip is made from latex free rubber. Silicone lubricant makes the tip self-sealing, provides precise movement and is virtually effortless.
- **Extended finger flanges** on 3cc syringes and a longer plunger rod allow for better handling and control.
- **Multiple Syringe Tip designs** - regular luer, luer lock, catheter, eccentric - allow for correct selection, based on procedural requirements.
- **Pre-attached Needle and Syringe Combinations** available in 3cc, 6cc and 12cc.
- **Syringes available** in 1cc, 3cc, 6cc, 12cc, 20cc, 35cc and 60cc sizes.

Monoject™ Softpack Needles

Injection Comfort for Companion Animals

Monoject™ needles are made of surgical grade stainless steel and are coated with a special grade silicone for lubrication. The combination of silicone and the sharpness of the point reduces both the force needed to penetrate and "drag" on insertion and withdrawal thus improving the comfort to your animal patients. Different bevel types are available with Regular (A) Bevel for intramuscular and subcutaneous injections, Intermediate (Intradermal) Bevel for intradermal injections; skin testing and Short (B) Bevel for intravenous or intra-arterial applications and nerve blocks.

Features and Benefits:

- **New and improved needle lubricant** increases animal injection comfort.
- **Cannula is laser welded and epoxy bonded to the hub** which ensures cannula integrity and greater compatibility with chemotherapeutic and other specialized drugs.
- **Precision ground, anti-coring, tri-beveled needle point** produces a consistently sharp needle for more comfortable injections.
- **Multiple point types (A, IN, B)** meet virtually all injection requirements.
- **Needle gauges** from 18G to 30G with needle length from ½ inch to 1½ inches.
