

Phenrex®

Premium ANTIBACTERIAL Moisturizing Skin Cleanser

Active Ingredient: **CHLOROXYLENOL 0.6%** (DIN 9410-21194)

CANINE/FELINE

Daily Hand Washing

Hot Spots

Wound Cleanser

3-Step Surgical Prep

- Phenrex can be used in combination with systemic and topical antibiotic treatments in caring for and healing hot spots.
- Phenrex contains an antimicrobial agent that is effective when used as a hand wash and contains moisturizers that won't dry out your hands.
- Phenrex is an effective wound cleanser that acts as a bactericidal against both Gram—positive and negative bacteria without causing stinging and irritation to the wound.
- Phenrex can be used as part of a 3-Step surgical scrub.

Dr. Roman Grudzinski, DVM
Applewood Veterinary Hospital, Mississauga, Ontario

"In my opinion, Phenrex is the best antibacterial soap I have ever used. It has multiple uses in everyday small animal practices and my staff love it."

Phenrex®

BOVINE

Reduce Contamination

Lubricating Formula

One Product Does It All

- Phenrex is gentle and mild enough to use for cleaning the perineum of animals prior to examining the birth canal.
- Phenrex can be used to cleanse hands and arms prior to gloving, lessening the risk of contamination to both the animal and the examiner.
- Phenrex is a low-sudsing formulation with properties that will provide adequate lubrication during assisted delivery when a cow or heifer with dystocia.
- Phenrex contains a moisturizing formulation that will not dry your hands and arms or the animal's reproductive tract.
- Phenrex can be used as a surgical prep for LDA, RDA or C-Sections.
- Phenrex is active against most Gram-positive and Gram-negative bacteria, yeast and fungi.

Dr. Bruce N. Robinson, DVM
Dundas Animal Hospital, Dundas, Ontario

"Phenrex is the best surgical scrub and obstetrical lubricant I have used in over 30 years of Mixed Practice. It is gentle on tissues and removes offensive odours."

EQUINE

Treatment or Preventative

Safe For Daily Use

One Product Does It All

- Phenrex is a mild, low-sudsing cleanser that rinses easily and is gentle enough to be used daily without drying out the horse's skin or causing staining.
- Phenrex contains antimicrobial agents and is effective against yeast and fungi in existing skin problems or as a preventative.
- Phenrex is an effective wound cleanser that acts as a bactericidal against both Gram—positive and Gram-negative bacteria without causing stinging and irritation to the wound.
- Phenrex is stable over a wide pH range and is not damaged by freezing or high environmental temperatures.

Dr. Stan J. Alkemade, BVSc, MRCVS, DVM
Canadian Equestrian Team Veterinarian (Team Canada Endurance)

"I have used Phenrex as a general house and barn skin cleanser since it was introduced to the market. I consider Phenrex a premium product that performs admirably in all general medical and laboratory hand washing situations. Phenrex does not cause drying and cracking of the hands, particularly in winter and frequent washing situations."

Also, as a horse owner and Canadian Equestrian Team veterinarian, I have used Phenrex on a number of contaminated horse wounds. Phenrex did not cause any stinging or irritation to the animal and definitely did not delay any wound healing.

I am very satisfied with Phenrex and will continue to use it."
